La settimana della moda: evento dell'industria della moda, della durata di circa una settimana, che permette agli stilisti ed alle case di moda di presentare le proprie ultime collezioni ed al pubblico di realizzare quale siano le ultime tendenze. Le settimane della moda più importanti, sono quelle che si tengono nelle *capitali della moda* Parigi, Londra e New York. Dai primi anni duemila, le settimane della moda si sono diffuse in diverse parti del mondo. Alcune settimane della moda rappresentano presentazioni di prodotti specifici. Per esempio la settimana della moda di Miami è dedicata ai costumi da bagno, mentre quella di Portland alle sfilate ecologiche.

Warp drive is a hypothetical faster-than-light propulsion system in science fiction works, most notably *Star Trek*. A spacecraft equipped with a warp drive may travel at fantasy speeds greater than that of light by many orders of magnitude. In contrast to other hypothetical FTL technologies, the warp drive does not permit instantaneous travel between two points but involves a measurable passage of time which is problematic to the concept. Spacecraft at warp velocity theoretically continue to interact with objects in "normal space". Debido a su modo de presentación visual, la televisión emplea mucha menos exposición que los libros para explicar los apuntalamientos de la puesta

Orígenes: Los antecedentes del provienen en Europa, donde en diferentes contextos, la celebración de las cosechas o de una festividad religiosa, servía como espacio para la reunión de los pueblos, creando un espacio de libertad individual y colectiva. En tiempos de la Colonia, los días de Carnaval y también en Navidad y Año Nuevo, los esclavos se cubrían con túnicas de vivos y chillones colores y salían a la calle para ir hasta las murallas de la ciudad. A cuyo pie se les permitía entonar sus cánticos y realizar sus bailes. Algunas prácticas carnavalescas comunes en Europa, como arrojar salvado y harina, arrojar agua con jeringas, apedrearse con huevos, naranjas, u otros objetos

The Battle of Dieppe Operation Rutter & Jubilee

AIR BATTLE

The Allied air operations supporting Operation *Jubilee* resulted in some of the fiercest air battles since 1940. The RAF's main objectives were to throw a protective umbrella over the amphibious force and beach heads and also to force the *Luftwaffe* forces into a battle of attrition on the Allies' own terms. Some 48 fighter squadrons of Spitfires were committed, with eight squadrons of Hurricane fighter-bombers, four squadrons of reconnaissance Mustang Mk Is and seven squadrons of No. 2 Group light bombers involved. Opposing these forces were some 120 operational fighters of *Jagdgeschwader* 2 and 26 (JG 2 and JG 26), the Dornier Do 217s of *Kampfgeschwader* 2 and various anti-shipping bomber elements of iii./KG 53, ii./*Kampfgeschwader* 40 (KG 40) and I./KG 77.

THE "ENIGMA PINCH" THEORY

Research undertaken over a 15-year period by military historian David O'Keefe uncovered 100,000 pages of classified British military archival files that documented a "pinch" mission overseen by Ian Fleming, that coincided with the Dieppe Raid. No. 30 Commandos were sent into Dieppe to steal one of the new German 4-rotor Enigma code machines, plus associated code books and rotor setting sheets. The Naval Intelligence Division (NID) planned the "pinch" raid with the intention to pass such items to cryptanalysts at Bletchley Park to assist with the Ultra project. The presence of other troops landing at *Dieppe* was to provide support and create a distraction for the commando units attempting to reach the German admiralty headquarters and capture the Enigma machine.
