INSTRUCTIONS

ISTRUCCIONES INSTRUCCIONS ISTRUZIONI

STEP 1

Place the vinyl on the surface, find the ideal position, and secure the top part with plastic tape so that it does not move.

PAS 1

Presenta el vinil a la superfície, busca la posició ideal i fixa la part superior amb cinta plàstica perquè no es mogui.

PASO 1

Presenta el vinilo en la superficie, busca la posición ideal y fija la parte superior con cinta plástica para que no se mueva.

FASE 1

Posizionare il vinile sulla superficie, trovare la posizione ideale e fissare la parte superiore con del nastro adesivo di plastica in modo che non si muova.

STEP 2

Apply the vinyl to the wall using a spatula or card. Use smooth, up-and-down motions to avoid wrinkles.

PAS 2

Enganxa el vinil a la paret usant una espàtula o targeta. Fes moviments suaus de dalt cap avall per evitar que apareguin arrugues.

PASO 2

Pega el vinilo a la pared usando una espátula o tarjeta. Haz movimientos suaves de arriba hacia abajo para evitar que aparezcan arrugas.

FASE 2

Applicare il vinile alla parete utilizzando una spatola o un cartoncino. Eseguire movimenti fluidi, dal basso verso l'alto, per evitare pieghe.

STEP 3

Use a spatula on the design to fix it to the transfer and carefully remove the backing.

PAS 3

Fes servir una espàtula sobre el disseny per fixar-lo al transfer i retira el protector del darrere amb cura.

PASO 3

Usa una espátula sobre el diseño para fijarlo al transfer y retira el protector trasero con cuidado.

FASE 3

Utilizzare una spatola sul disegno per fissarlo al trasferimento e rimuovere con cautela il supporto.

STEP 4

Remove the transfer very slowly so as not to lift the vinyl and press from the center outwards to remove bubbles or creases.

PAS 4

Retira el transfer molt lentament per no aixecar el vinil i pressiona del centre cap a les vores per eliminar bombolles o plecs.

PASO 4

Retira el transfer muy lentamente para no levantar el vinilo y presiona del centro hacia los bordes para eliminar burbujas o pliegues.

FASE 4

Rimuovere il trasferimento molto lentamente per non sollevare il vinile e premere dal centro verso l'esterno per rimuovere bolle o pieghe.

STEP 5

Apply heat evenly to the pieces with a hairdryer (without holding it too close) for a better seal. If any air bubbles remain, prick them with a pin.

PAS 5

Aplica calor amb una assecadora uniformement sobre les peces (sense acostar-la gaire) per a un millor segellat. Si en queda alguna bombolla, punxa amb una agulla.

PASO 5

Aplica calor con una secadora uniformemente sobre las piezas (sin acercarla mucho) para un mejor sellado. Si queda alguna burbuja de aire, pincha con un alfiler.

FASE 5

Per una migliore tenuta, riscaldare uniformemente i pezzi con un asciugacapelli (senza tenerlo troppo vicino). Se dovessero rimanere bolle d'aria, forarle con uno spillo.

STEP 6

Align each piece from one end to the other to ensure visual continuity. This will prevent the joints from being noticeable and achieve a perfect modular finish.

PAS 6

Alinea cada peça des d'un extrem a l'altre per assegurar-ne la continuïtat visual. Així evitaràs que es notin les unions i aconseguiràs un acabat modular perfecte.

PASO 6

Alinea cada pieza desde un extremo a otro para asegurar la continuidad visual. Así evitarás que se noten las uniones y lograrás un acabado modular perfecto.

FASE 6

Allineare ogni pezzo da un'estremità all'altra per garantire continuità visiva. Questo eviterà che le giunzioni siano visibili e otterrete una finitura modulare perfetta.
