

Dr Ayats

vibranding.

La identidad de Dr. Ayats se define para transmitir confianza, excelencia técnica e innovación en el ámbito de la neurocirugía mínimamente invasiva. El logotipo, construido con una tipografía customizada de rasgos humanistas y caligráficos, proyecta cercanía, trato humano y profesionalidad.

El isotipo, basado en un triángulo equilátero, dibuja una A de Ayats que simboliza precisión, equilibrio y disciplina médica. Su estructura modular permite jugar con proporciones, colores y escalas, convirtiéndolo en un recurso capaz de generar patrones, ritmos visuales y composiciones vivas.

La paleta cromática y la tipografía Mont completan un sistema flexible y coherente que une ciencia, humanidad y claridad en cada punto de contacto.

Dear Representative,

On behalf of [your organization], I am writing to strongly oppose H.R. 3699, "Works Act," introduced on December 16, and referred to the House Oversight and Government Reform Committee. This bill would prohibit federal agencies from conditioning their grant funding to require that all members of the public be given online access to the products of the research that their tax dollars fund. This bill depends on guaranteed access to cutting-edge research upon which their education, and significantly inhibit our ability to advance scientific discovery and innovation in all scientific disciplines.

Most critically, H.R. 3699 would reverse the highly successful National Institutes of Health (NIH) Public Access Policy, prohibit American taxpayers from accessing the results upon of the crucial biomedical research funded by their taxpayer dollars, and stifle critical public advancements in life-saving research and scientific discovery.

Because of the NIH Public Access Policy, millions of Americans now have access to vital health care information from the NIH's PubMed Central database. Under the current policy, more than 90,000 new biomedical manuscripts are deposited for public accessibility each year. H.R. 3699 would prohibit

Sincerely,
